

## Custom Lanyards

Build Your Own

Download PDF

Pivot Point manufactures high-quality wire rope lanyard assemblies in steel and stainless steel.

Wire Rope Lanyard are made from durable aircraft cable and are typically attached to pins and other fasteners to prevent loss. They may be used as tethers for components and also used as door restraint cables.

A selection of stock lanyards are available for immediate purchase.

We specialize in custom wire rope lanyards to suit your specific application. Virtually endless configurations are available- limited only by your imagination! View examples of some of the common end fittings used . Don't see what you need? Just ask! We can help to create the perfect lanyard assembly for your application.

Typical wire rope coatings include PVC and Nylon. PVC coating is more popular because of its appearance, flexibility, and low cost. Nylon offers more durability and abrasion resistance. Coatings are available in many colors.

For a low cost alternative for light-duty retention, Standard Nylon Lanyards and U-Lock Nylon Lanyards are also offered exclusively by Pivot Point.

**Recent advances in automation produce high quality Steel Lanyards at prices competitive with imports and with FAST lead times!**
