

Detent Clevis Pins

Build Your Own

Download PDF

Detent Clevis Pins are essentially a cotterless Clevis Pin that feature a ball detent that depresses and springs up to hold the Clevis Pin into place. Used for assembly speed or where cotter pins are difficult to use, this fastener lowers labor costs. Detent Clevis Pins allow for easy quick release fastening for flush-mount applications. Also known as Cotterless Pins, Cotterless Clevis Pins and Headed Quick Release Pins. For other quick release pins and quick release devices, please see our Home Page to view other product offerings.

Made to order, Detent Clevis Pins are based on standard Clevis Pin head and shank dimensions. Ends are chamfered for easy insertion. Detent Clevis Pins are typically zinc plated carbon steel, while the ball detent is 300 series stainless steel. Fully stainless steel Detent Clevis Pins are also available, as well as other materials and finishes per your specifications.

Ball compression force can be adjusted to meet the force required to insert and remove.

Select "configure product" to customize a Detent Clevis Pin to your exact specifications! For other quick release pins and quick release devices, please see our Home Page to view other product offerings.
