

Sleeves for Loops

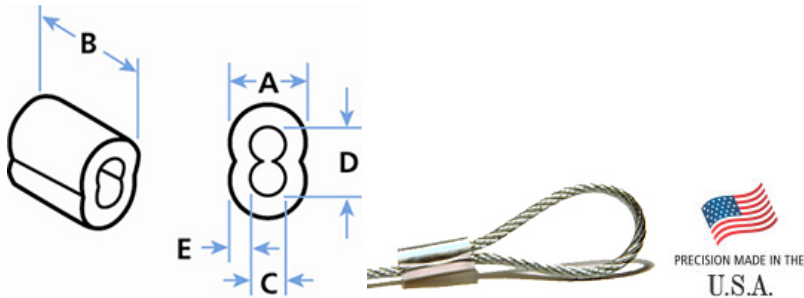

- View Standard Items
- Download PDF
- Request Information / Quote

Lanyard cable is passed through the sleeve and fed back through to form a loop on the lanyard end. Sleeve is then crimped tight onto the cable. Use loops to attach to fasteners, pins or other components; or to loop the lanyard around itself and onto equipment.

Contact us for a quote on [Stock](#) or [Custom](#) Wire Rope Lanyard Assemblies using the loop size of your choosing, as well as other end terminals.

Use our [Cable Cutter and Crimp Tool](#) when making your own looped assemblies.
